Creating New Project:

Step1: Open Android Studio:

Launch Android Studio on your computer.

Step2:Start a New Project:

On the welcome screen, click "Start a new Android Studio project".

Screen Shots:

Step3:Configure Your Project:

- ❖ **Name:** Enter your app's name.
- ❖ **Package Name:** Enter a unique identifier (e.g., `com.example.myapp`).
- ❖ **Language:** Choose between Java or Kotlin.
- ❖ **Minimum SDK:** Choose the lowest Android version your app will support.

Step4:Choose a Template:

Select a project template (e.g., "Empty Activity"for a simple starting point), then click "Next".

Step5: Configure Activity:

- ❖ **Activity Name:** Default is `MainActivity` (you can change it).
- ❖ **Layout Name:** Default is `activity_main.xml`.
- ❖ **-Click "Finish".**

Step6:Run the App:

Once the project is set up, click the "Run"button to launch the app on an emulator or a physical device.
